## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments with respect to claims 1-3 and 6 set forth in the Appeal Brief filed 5 May 2003 have been considered but are moot in view of the new ground(s) of rejection. New art has been found which more directly reads on Applicant's invention. Accordingly, prosecution of the case is hereby reopened, and a new non-final rejection is set forth below.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Viking Freight.

As per claim 1, Viking Freight discloses an internet-based system for ordering freight services at a user computer comprising sequentially displaying a plurality of accessorial services (see accessorial services listed sequentially at bottom half of upper right frame) and requiring the user to address/accept/decline each of the accessorial services (by either checking or not checking the checkbox associated with each service), wherein the services comprise at least inside delivery and residential delivery. Since Viking Freight is an internet-based system, it inherently functions using a server computer and distributed network, and further includes a

database containing accessorial service information (used to determine shipping rate based on chosen services).

The Examiner notes that the phrase "requiring the user" is somewhat vague for the purposes of patentability. Under its broadest interpretation, displaying the services on the screen where the user must either check or not check each box can be considered requiring the user to accept or decline each of the services. For purposes of patentability, the claim must recite more specifically how the requiring step of applicant's invention is performed.

As per claim 2, Viking Freight discloses the services being addressed individually (by each checkbox).

As per claim 3, Viking Freight discloses the completion of the transaction being completed only after each service has been addressed (As noted with regard to claim 1, the user addresses each of the services by either checking or not checking the associated checkbox. To overcome this rejection, the claim must recite more specifically how the requiring step of applicant's invention is performed.).

As per claim 6, Viking Freight discloses the accessorial services being presented sequentially as a list.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
